

HostBridge Product Support Life Cycle

HostBridge Product Support Life Cycle provides a clear and predictable method to help you plan your implementation, upgrade and support requirements. Availability of technical support and defect resolution varies depending on the stage of the product in its support life cycle. HostBridge uses the following phases to categorize its solutions:

Phase	Definition	Available Support *
Active	Current shipping version of the product	Technical support and defect resolution
Supported	Product that continues to be supported, but is not the most current version	Technical support and defect resolution
Unsupported	Product that is no longer sold or supported	None, unless by special arrangement

* Support available to customers with an active HostBridge Support plan only

The following table shows the support life cycle for HostBridge solutions:

Product	Version	General Availability *	End of Support **
HostBridge	6.91	May 28, 2020	The next release date plus 36 months
HostBridge	6.81	February 5, 2019	May 28, 2023
HostBridge	6.78	September 26, 2016	February 5, 2022

HostBridge does not provide support for the product operating on versions of IBM CICS Transaction Server for which IBM has discontinued support.

* The **General Availability (GA)** date listed is the latest date that a version/release of the product is available to all users, regardless of language or media.

** The **End of Support (EOS)** date listed is the last date on which HostBridge will deliver standard support services for a given version/release of a product.
